Mr. Roos began discussion of this item by noting that he had not been present at the prior Board meeting where the Board dealt with two cases that involved interpretation of this rule. The Home Inspector Rules and Standards Committee discussed the Board's previous interpretation of this rule in the context of home inspectors paying fees to realty companies in order to become part of a preferred vendor or similar program. Mr. Roos and the Committee were concerned that such programs do indeed violate the rule.

The following members of the public addressed the Board to state their opposition to the preferred vendor and similar programs, which they believe to be in violation of A.A.C. R4-30-301.01(B)(1):

Mr. Brian Grant, Chairman of the Home Inspector Rules & Standards Committee
Mr. Dave Swartz, Certified Home Inspector
Mr. Greg Land, Certified Home Inspector
Mr. Michael Williams, Certified Home Inspector, Rules & Standards Committee
Mr. Greg Oswalt, Certified Home Inspector

Speaking in favor of the preferred vendor programs, that they do not violate the rule, was Mr. Jack Harinck, Certified Home Inspector.

After discussion by the Board, Mr. Roos moved that staff draft a substantive policy statement to clarify that the preferred vendor and similar programs are in violation of A.A.C. R4-30-301.01(B)(1). Seconded by Mr. Lane. After further discussion, MOTION CARRIED.

9. DISCUSSION AND ACTION OF POSSIBLE RULE CHANGE REGARDING ARCHITECTURAL ENGINEERING EXAMINATION AND BRANCH OF ENGINEERING AS RECOGNIZED BY THE NATIONAL COUNCIL OF EXAMINERS FOR ENGINEERS AND SURVEYORS (NCEES)

Mr. Dalrymple explained that the NCEES now recognizes this field of engineering and began administering an exam for this discipline in April 2003. He stated that it has been the Board's practice to follow the example of NCEES as far as the branches of engineering that it recognizes. He indicated that in order for the Board to create this designation, a rule package would have to be initiated. The Director said the new discipline recognizes what professional engineers are doing currently as far as designing systems for structures. The Chair expressed the opinion that the action that was being proposed needs further "vetting" and concluded that from a practical standpoint, it was not necessary for the Board to take action at the present time. Mr. Nelson stated he would like to see whether or not there is support for this action outside the state and indicated he would get feedback from the American Institute of Architects (A.I.A.) prior to the Board's taking up the matter again.

10. DISCUSSION ON A.R.S. 32-110 AND POSSIBLE BOARD ACTION ON EMERGENCY RESPONSE ISSUES

Mr. Jack Gordon of the Structural Engineers Association of Arizona (SEAOA) was present and addressed the Board. He explained that his organization has formed a Committee comprised of structural engineers who can perform structural assessments after a major disaster has occurred. He said he would like the Board's recognition of his committee's existence as a Board-authorized program, as well as extension of the liability protection that is provided in the Board's statutes under A.R.S. § 32-110. Mr. Starling indicated he was a member of the Committee, which he said provides a vital function. Ms. Burns explained that Board statutes contain no authority for a Board-authorized program for such an endeavor and that the Legislature would have to authorize such a program. Mr. Greenslade explained that the Legislation & Rules Committee was investigating the matter. It was suggested that legislative action would not occur before this summer and that the Board could not assume any new program for another 18 months. The Chair expressed the view that the Board should pursue the matter but not take any action at the meeting.

11. DIRECTOR'S REPORT

The Board reviewed the Director's report, which summarized: recent personnel changes, scheduled staff training, preparation for the 2005 sunset audit, and progress in securing a new computer program to replace the AS400 system. With respect to the last item, the report addressed the fact that some in the Department of Administration are looking into the possibility of allowing other state agencies to use the new computer program, provided those agencies are willing to opt into it, and with costs to be borne by the Department of Administration.

12. BOARD MEMBER REPORTS ON OUTSIDE ACTIVITIES

National Association of State Boards of Geology (ASBOG) – Engineering Geology Exam

Mr. Greenslade reported on the two-year effort of this Board to develop a new defensible examination for the engineering geology practice. He suggested that Arizona urge other states and universities to take whatever action was necessary to certify the test. The mechanics of administering and funding the test and the number of enrollees willing to take the test were discussed. Mr. Dalrymple said most of engineering geologists are currently registered as civil engineers, which may be inappropriate. He said the consensus of opinion the last time the Board considered this matter was to retain the discipline and that was also the consensus among the universities. In view of that fact, Mr. Dalrymple said the only alternative available to the Board was to develop a test.

13. FUTURE AGENDA ITEMS

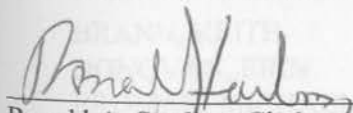

The Board discussed the possibility of adding "architectural engineering" as a future agenda item but it was concluded that this item would first be considered by the Legislation & Rules Committee.

14. FUTURE BOARD MEETINGS - The next meeting is scheduled for May 11, 2004

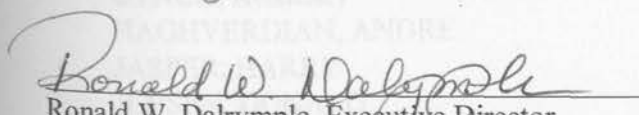

15. ADJOURNMENT

Ms. Cornelio moved to adjourn the meeting. Seconded by Mr. Lane. MOTION CARRIED. Meeting adjourned at 11:48 a.m.
